Summary

An ambitious software developer able to dauntlessly construct full stack web applications from the ground up. I look forward to using my background to become an essential component of an organization.

Skills

Dynamic web pages (**HTML, CSS, Bootstrap, JavaScript**)	**CRUD** functions for data manipulation
Interactive in-browser apps (**jQuery, AJAX**)	**Express.js** middleware to help handle HTTP requests
RESTful API utilization to collect JSON data	**MVC** file architecture paired with user authentication
MySQL/Sequel Pro and **MongoDB** for data persistency	**Heroku** and **GitHub** pages for project deployment
Node.js to handle server side requests	**React.js/React-Router** for a more re-usable and interactive UI

Work History

Account Manager: ImmixGroup, Inc. – McLean, VA   10/2015 to Present

- Expands the business pipeline of IT manufacturer Hewlett Packard Enterprise Security Products, leaving the software renewal process for SLED, Federal, and commercial organizations frictionless.

- Strategically works with other partners and government resellers to provide the best solution, based upon competition and strict government procurement policies.

Market Specialist: FedBid, Inc. – McLean, VA   06/2015 to 09/2015

- Fortified government procurement of technology (hardware and software), helping sustain a business platform that helped the public sector and businesses in the private sector alike.

- Analyzed marketplace state in order to achieve high-competition government solicitations, leveraging relationships with providers to spur technological growth within the Department of Defense.

Education

George Washington University – Certificate in Full Stack Web Development   05/2017 to 10/2017
Stimulating full stack web development curriculum focusing on the modern technological essentials for an engineer; including a JavaScript-centric MERN stack and database utilization for persistency. Bundling these skills, a developer is able to create crisp websites and applications from their foundation.

James Madison University - Harrisonburg, VA   08/2011 to 05/2015
B.S. in Integrated Science and Technology. Double Concentration – Manufacturing & Engineering || Business

Projects

- **ScrapingWithMongo:** Scrub the newest articles from Medium.com's technology section, save the ones you want to read later, and add comments and feedback! Code || App

- **SiliconValleyHangman:** Play a classic game of hangman themed around the hot HBO comedy. Hints are given out as needed! Think you have what it takes to be an employee at Pied Piper? Code || App

- **TrainScheduler:** Keep yourself on time and on the rails with this app tracking your trains using Firebase. Code || App

- **Curb-Your-Comment:** Make yourself an account and login to this fun and goofy app for Seinfeld and Curb lovers only! Blog and review the latest episodes with other fans. Code || App
